

Household Hazardous Material Support

The DPW has requested your unit give all soldiers living on post in Government facilities this flyer. Attached is a list of household hazardous items that must not be placed in refuse containers for disposal. Improper disposal of this material is against German law and could lead to fines. In addition, these materials cannot be shipped with your household goods or your hold baggage because of fire, safety or health concerns. We request that you separate these items from your items to be shipped and turn them in to us.

You will be given two containers to place your household hazardous materials in prior to your Government pack-out. The containers are marked either “Corrosive” or “Flammable”. Each container will have an instruction sheet (that will show what types of items can be placed into it) and return instructions. Serviceable items will be placed in the SHIP Store for use by soldiers and their families remaining within the Garrison. Non-serviceable items will be disposed via our Hazardous Waste Direct Removal Contract.

In order to make this easy for you, we will drop-off and pickup the containers and contents at your Government residence. We recommend you collect this HAZMAT prior to drop-off of the containers and return them immediately to avoid inconveniencing you and increasing Government costs. Contact our HAZMAT/ HAZWAS Program Manager, Mr. Michael McNalley, at DSN 344-7988, 06151-1377988, or michael.mcnalley@us.army.mil if you have any questions or need containers delivered. Please request containers prior to your Government pack-out, allowing two days for delivery.

COMMON CORROSIVES INCLUDE:

Air Fresheners	Ammonia-based Cleaners
Bleach	Disinfectants
Drain Cleaner	Fabric Cleaner
Floor/furniture Polish	Household Batteries
Oven Cleaner	Photo Chemicals
Rug/upholstery Shampoo	Spot Remover
